Leetcode

Education

Heritage Institute of Technology

B.Tech in Computer Science — 8.9/10

Aug. 2019 – May 2023

Kolkata

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Design Patterns
- Object Oriented Programming
- Operating System
- Database Management
- Computer Networks

Experience

DP World

April 2025 – Present

Group SDE-1

Bengaluru

- Built Node.js integrations with Veracode APIs (HMAC-auth) to extract security quality scores, policy evaluations, severity counts, and vulnerability breakdowns, automating **70%** of security reporting across multiple applications.
- Developed the post-login homepage dashboard displaying **100K+** bookings with location-wise distribution and live aggregates, enabling real-time operational and business visibility.
- Architected a config-driven, event-based booking state machine using clean architecture, processing thousands of booking lifecycle events per day and managing **10+** booking states with tenant/product-specific transition rules.

Curie Money

July 2023 – January 2025

Software Engineer

Bengaluru

- **Neo-Banking Platform Development** - Architected a Spring Boot-based banking platform in partnership with Yes Bank, integrating KYC verification (FATCA, PAN, Aadhar) and developing secure RESTful APIs for account management, streamlining user onboarding and improving efficiency by 70% while ensuring compliance with RBI guidelines.
 - Implemented backend handling of UPI transactions, managing webhooks for transaction status updates and ensuring reliable processing, contributing to a **99%** success rate for UPI-related operations.
- **Mutual Fund Processing System** - Implemented backend integration for user folio creation and onboarding, as well as mutual fund allocation/deallocation, also led the design and implementation of a high-performance reconciliation system integrating using CAMS API for real-time transaction processing of WBR files, reducing manual reconciliation efforts by more than **90%**.
 - Developed a robust system for mutual fund purchase and redemption across multiple AMCs, handling selection logic, transaction processing, and comprehensive failure management with automated retries, ensuring high reliability and user satisfaction.
- **Account Aggregator Integration** - Spearheaded the development of a secure Account Aggregator system as a Financial Information User (FIU), enabling seamless aggregation and access to users' financial data from multiple banks, processing over **10,000** transactions daily while ensuring data integrity and accuracy.
 - Designed and implemented a comprehensive consent management framework, allowing users to control data sharing while ensuring compliance with RBI regulations and data privacy standards, enhancing user trust and engagement.

Red Hat

January 2023 – July 2023

Software Engineer Intern

Bengaluru

- Worked in **Wildfly Elytron** team, Where Implemented Client-side HTTP Authentication (**Basic, Digest, Bearer, Client side Certificate Auth**) for Elytron using Java 11 HttpClient.
- Added Unit testing using **JUnit5** and **Mockito3** and Integration test using Arquillian framework.

Zimtive Software Technologies

May 2022 – December 2022

Software Engineer Intern

Remote

- Completed Full- Stack Engineer internship utilizing SpringBoot, React, and PostgreSQL technologies, resulting in comprehensive knowledge of both front-end and back-end development.
- Developed a back-end system for the complete job application process, including multiple stages from job posting by recruiters to candidate selection or rejection and handling candidate onboarding steps.
- Implemented different user roles such as candidate, HR, interviewer, and hiring manager, demonstrating proficiency in authentication and authorization techniques.

Technical Skills

Languages: Java, Python, JavaScript

Software & Tools: AWS, Docker, Kubernetes, Redis, Kafka, Postman, Git, MySQL, PostgreSQL, Linux

Technologies/Frameworks: Spring, SpringBoot, Hibernate, Node.js, React.js, Selenium, Design Principles
