EDUCATION

National Institute of Technology Warangal

B. Tech. in Electronics and Communication Engineering | **CGPA: 8.17**

Warangal, India

May 2023

EXPERIENCE

Oracle India Pvt. Ltd

Senior Software Engineer

Sept 2025 – Present

Hyderabad, India

- Engineered a high-throughput Elasticsearch pipeline utilizing a custom batched data ingestion mechanism; successfully managed 500GB+ of ACL data while significantly reducing system bottlenecks and optimizing enterprise search performance.
- Orchestrated the seamless migration of data security features to a modern ReactJS-based framework, streamlining the user experience by reducing page load latency by 40%.
- Engineered a highly available, fault-tolerant recovery framework for distributed jobs utilizing DB-backed checkpointing, ensuring 100% state consistency and zero data loss during system failures.
- Ensured high availability and operational stability for a global customer base by actively debugging and mitigating 40+ critical production outages and system anomalies.

Oracle India Pvt. Ltd

Software Engineer

June 2023 – Sept 2025

Hyderabad, India

- Drove development of scalable user management and data security initiatives within Oracle Fusion Cloud HCM, delivering solutions for over 6,000+ enterprise clients.
- Engineered a Java-based migration ecosystem with robust bulk Import/Export and auditing capabilities, streamlining complex configuration transfers across DEV/TEST/PROD environments for 40+ global clients.
- Developed high-performance REST APIs with sub-50ms latency and built multiple security UI pages, accelerating the end-to-end delivery of identity features by 30%.
- Optimized an Elasticsearch data pipeline, utilizing the Bulk API and dynamic payload chunking to safely and rapidly ingest complex user security (ACL) documents.

Amazon, India

Software Development Engineering Intern

May 2022 – July 2022

Hyderabad, India

- Developed dynamic React UI components in FDPUIConsole for auto-scaling and instance configurations, enabling customer self-service and reducing on-call workload.
- Upgraded backend APIs and expose physical connection database names, significantly improving system visibility for end users.
- Resolved a data inconsistency bug in batching parameters, ensuring DataGraph definitions accurately reflected user inputs.

PROJECTS

Refrigerator Stock Automation System

- Designed and implemented an IoT-based system to monitor and manage refrigerator stock levels in real time.
- Automated low-stock detection with email notifications using AWS SNS, ensuring timely replenishment.
- Developed a Flutter mobile application to display stock status and enable users to place orders when shortages occur.
- Integrated IoT devices with AWS Cloud services using MQTT protocol for reliable and real-time data communication.

Splitsmart

- Developed a mobile application to help friends and roommates track and split shared expenses efficiently.
- Implemented group creation, friend management, and in-group expense splitting features.

ACHIEVEMENTS

Codeforces: Highest Rating: 1472 (Specialist) | **Codechef:** Highest Rating: 1818 (4-Star)

JEE MAINS (2019): All India Rank 7345

SKILLS

Languages : Java, JavaScript, Dart, C++

Tools/Libraries/Frameworks/Others : AWS (SNS), Firebase, Elastic Search, OpenSearch, MQTT, IoT, Microservices, Algorithms, RDBMS, SQL, REST API, Git, Spring Boot, React.js, Flutter, System Design, HTML, CSS, Docker
